Accreditation Field Test

Thirty-five districts have agreed to participate in the accreditation field test in Spring 2013. Volunteer districts were initially recruited from the QPA Advisory Council and the Council of Superintendents. In all, 23 districts volunteered and all were included in the field test. The remaining 12 districts were personally invited to participate based on their location and size.

Our next steps will be to finalize the in-depth and summary rubrics, to create a field test evaluation tool and to provide training/instructions to participating districts.
