The Kansas Educational Data Users Consortium (KEDUC) aims to promote the development and utilization of a robust statewide data system that enables research, improvement, and innovation in Kansas education. With that mission in mind, this web site has been established as a resource for educators and researchers throughout the state. Please browse around to see everything available to you. Check back often, as we plan to update this site frequently.

One of our primary goals is to make it as easy as possible to find data about education in Kansas by consolidating information from many sources. Below you will find links to a wide variety of data and information accessible to you. If you know of a database or link that should be added, please send an email to the address below.

Kansas Data Sources

The annual **Accountability Report** is required by the Legislature and is intended to provide a snapshot of Kansas education for the most recently completed school year by using statewide data.
