

April 2018 MIS – FAQ

Addressing Verification 0224

Verification 0224 contains logic previous present in verifications 0203 & 0210. Verification 0224 is intended to identify what data changed from the December 1 Final report.

Verification description: 0224 - December 1st Responsible school, area of Disability or Educational Environment has changed from the final 12-1 report

How to identify changes in the data.

Compare values in the Final December 1 report to the same values in a current Projected December 1 report. Verification 0224 is triggering on current data as listed in the current Projected December 1 report.

Responsible building is listed in Column “P”

Federal / OSEP Environment is listed in Column “AB”

Federal Disability is listed in Column “AC”

April 2018 MIS – FAQ

Addressing Verification 0224

Verification 0224 can be corrected

The next step is to discover why the data changed. The focus is on service lines with start and end dates that intersect December 1. Some possibilities may include

Responsible school – Student moved or changed schools. The current responsible school has replaced with the December 1 School on the service lines.

Federal / OSEP Environment – Service line values have changed. A new IEP was developed and the new IEP changed frequency, duration and location of services. These new service may dates that intersect December 1 with different service settings, different service frequency, different minutes of service or days per week. The total number of services lines that intersect December 1 may also have increased or decreased.

Federal Disability – The primary or secondary disability of the student subsequently changed. The change in disability category intersects the December 1 date.

To resolve verification 0224 – restore the service lines to the values that were present as of the December 1 final report date. Having documentation as to the service line values present at the time the December 1 report was finalized with help resolving 0224
