

Who is My Field Services Specialist?

We, as the Kansas State School for the Blind's regional Field Services Specialists, would like to take this opportunity to introduce ourselves. Our team has grown and changed, with the hope of increasing our availability and support to teachers, students, schools and families across the state of Kansas.

The role of a KSSB Field Services Specialist is to support districts and families through a variety of avenues. Some of the most common requests we fulfill include:

- Mentoring new teachers in training.
- Technical assistance (which includes answering day-to-day questions from TSVIs, COMSs, teachers and families, coaching and mentoring, as well as providing training on specific topics, assistive technology, etc.)
- Assisting TSVIs with comprehensive vision evaluations. (There is a charge for evaluation only if the FS Specialist is requested to be primarily responsible for conducting the assessment and/or reporting the results.)
- Free professional development presentations for any size group on vision-related topics.
- Caseload analysis
- Planning and facilitating Expanded Core on the Road events for students across the state.
- Scheduling and facilitating Low Vision Collaboration Clinics with doctors across the state. (Children Birth - 3: No Charge; Ages 3 - 21: Districts pay \$50 per student.)
- Much more!!

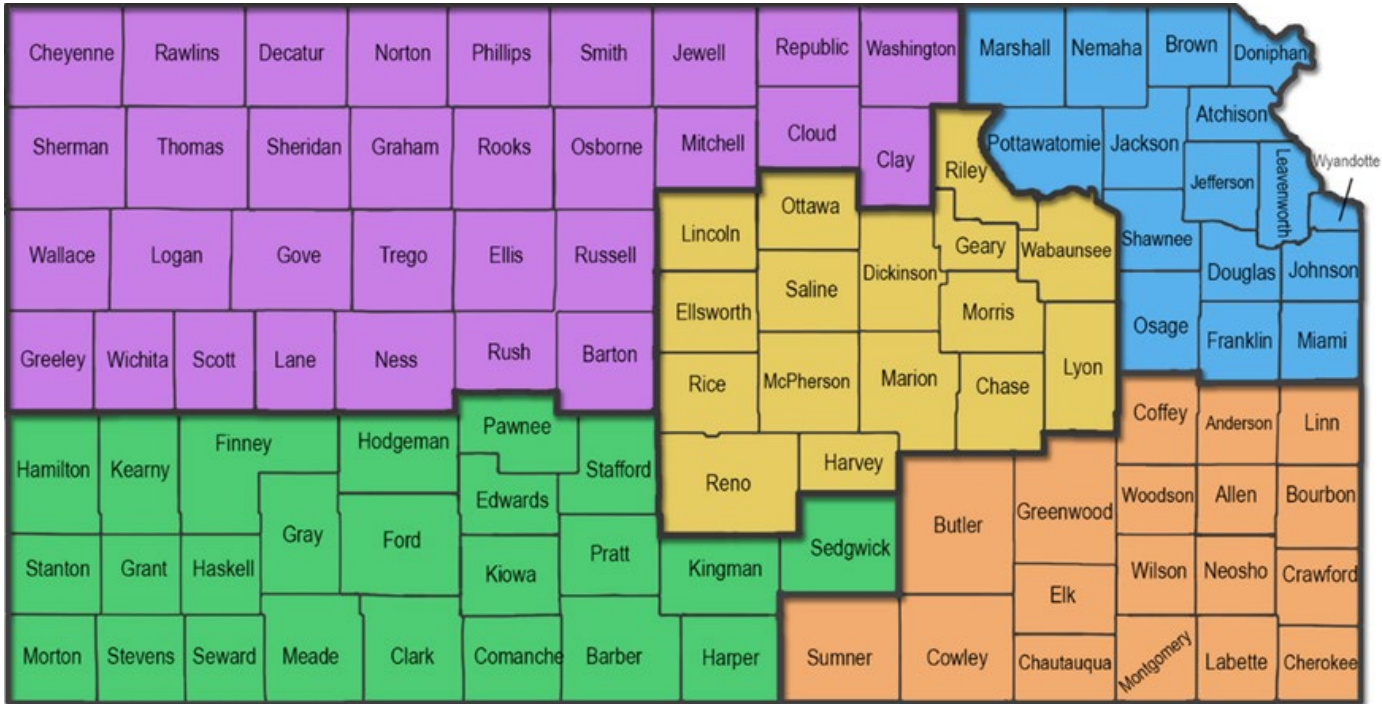

Please feel free to reach out to your regional Field Services Specialist with any questions. Additionally, if support is needed regarding a student with an identified or suspected visual impairment, your regional Field Services Specialist is ready to help. Remember that technical assistance requests and KSSB events are always free.
